

Summary

Motivated Computer Science graduate from RMIT University with a strong practical background in backend and full-stack development using Java, Spring Boot, JavaScript, and Python, combined with a solid foundation in software engineering, algorithms, and data structures. Proficient in designing and developing robust, scalable backend services and APIs, with practical knowledge of role-based access control, authentication and authorization gained through academic projects and applied network security modules in Singapore Polytechnic Diploma in Computer Engineering.

Familiar with agile methodologies and Scrum practices from university and client projects, as well as DevSecOps concepts and continuous integration/delivery pipelines, using tools such as Git, Docker, and GitHub Actions. Experienced in deploying applications to AWS (including EC2, DynamoDB, S3), and leveraging cloud-native services to build secure and resilient systems. Background in networking protocols, router configuration, firewall setup, and Linux system administration supports understanding of distributed systems, containerisation, and secure coding practices.

Education

RMIT University, Melbourne

Bachelor of Computer science | Graduated July 2025

Singapore Polytechnic

Diploma in computer engineering | Graduated 2020

Technical skills

Programming Languages: Java, Python, C++, JavaScript, HTML, CSS

Frameworks & Tools: Spring Boot, Docker, Git, GitHub Actions, Firebase, Next.js

Cloud & DevOps: AWS (EC2, S3, DynamoDB), CI/CD pipelines, containerisation

Networking & Security: RBAC, authentication & authorization, router configuration, firewall setup, Linux systems, cybersecurity fundamentals

Methodologies: Agile (Scrum), MVC architecture, test-driven development

Experiences

Internship

ST Engineering electronics Ltd. | March 2019 – August 2019

- Conducted diagnostic testing of MDT (Mobile Data Terminals) post-repair.
- QA testing for Interior Passenger Information Display System in Buses.
- Analysed data to track repair success rates and identify fault trends.
- QA testing for Interior Passenger Information Display System in Buses.

Project

Woofya – Full stack application (HTML, CSS, JS, PHP)

- Collaborated in a team to build part of the web app for dog owners to manage profiles.
- Developed onboarding process for users and their dogs.
- Built profile and settings page with edit functionality (user and dog).
- Enabled QR code sharing for pet profiles.

– Full stack application

- Collaborated within a scrum team, utilised product backlog for task prioritisation and automated workflow via GitHub actions to streamline development.

- Developed a full stack web application with an MVC architecture to manage veterinary clinic operations

Personal Portfolio Website – Next.js, Tailwind CSS, Vercel

- Built responsive portfolio website showcasing projects and technical skills
- Implemented dynamic content management and optimised for SEO performance
- Deployed using modern DevOps practices with automated testing and deployment

Vacuum Cleaning Game – C++

- Designed and implemented a C++ game simulating a vacuum cleaner moving within a bounded space
- Applied OOP and advanced C++ techniques such as pointers, dynamic memory management.
- Developed input validation, real time board display, dynamic board resizing
- Tested on Unix systems as well as memory checking using Valgrind

Key Strengths & Skills

Backend Development & Software Engineering: Strong programming skills and architectural thinking for building scalable, maintainable systems.

Cloud & DevOps: Hands-on with AWS, containerisation using Docker, and CI/CD pipelines for reliable deployments.

Security & Networking: Knowledge of RBAC, authentication, Linux administration, and network protocols supporting secure system design.

Agile Collaboration: Experienced working in multidisciplinary teams, applying Scrum and iterative development practices.

Problem Solving & Continuous Learning: Committed to exploring new tools, technologies, and frameworks to deliver impactful solutions.

Leadership & Teamwork: Leadership experience in high pressure environments, effective managements of teams and collaboration between different specializations.
